Only Choice Bulbs. Grown and Offered by

VITO CONENNA BULB FARM

State and Federal Inspected. Licensed.

All bulbs listed are grown at our farm. Special care given and raised on well drained black sandy loam. We also grow shrubs and perennial plants.

Terms—Cash with order.

Prices—Six at dozen rate, fifty at hundred rate. Special price on 1,000 lots. Orders of \$1.00 or more prepaid, under \$1.00 add 10 per cent.

We sell only first class bulbs and true to name. If any are not we will replace them, but we are not responsible in any way for bulbs, roots or plants we send out, inasmuch as the growing is beyond our control.

BULBOUS IRIS OR NOVELTY IRIS OUR SPECIALTY

The cut flower irises or the orchid are very oramental and hardy everywhere.

Culture same as for tulips. For best effect they should be planted in groups of 25 or more. They grow 25 to 26 inches high and come in bloom following late tulips and continue to bloom until middle of July. No word can describe the beauty of these novelty irises. You must try and see it to convince yourself.

Our price has been greatly reduced and we offer the best collection on the Pacific Coast. Choicest select varieties imported by us direct from Holland. Following classes: Dutch, Spanish, English.

Stock limited, order early.

TRIUMPH TULIPS NOVELTY

This new class of tulips is something exceptional. A new race of tulips obtained by crossing single early varieties with Darwin Tulips, in which the very best properties of both sorts are combined.

The flowers of these tulips are exceptionally large, being twice as large as those of the largest Darwin Tulips. They are bright colored, and robust growers, with flowers about ten days sooner than the Darwin Tulip.

These tulips remain spotless even in the roughest weather, in contrast to the existing varieties of tulips, which in wind and hail showers get spots on their leaves.

You should see and try them to convince yourself we offer the best collection of the choicest varieties of Triumph Tulips, imported direct from Holland.

ALBIRIO—Dark wine red with fine golden edge, inside base white, bluish edge, very large cup; height 22 inches.

Each \$1.00

HESPEROS—Dark carmine red violet, becoming darker towards the base; inside base golden yellow, long cup; height 24 inches.

TITANIC, pints	\$7.00

No orders for iris planting stock accepted later than Sept. 1st. Above postpaid.

CULTURAL DIRECTIONS

PLANTING TIME

All bulbs should be planted in the autumn for spring flowering. Bulbs may be planted from September until the ground freezes; the earlier the better. Bulbs should be planted so that the roots can get started before cold weather sets in.

Anemone	2	inches deep, 6 inches apart
Crocus	2	inches deep, 4 inches apart
Narcissus	4	inches deep, 6 inches apart
Daffodils	4½	inches deep, 6 inches apart
Dutch Iris	4½	inches deep, 4 inches apart
Spanish Iris	4½	inches deep, 4 inches apart
English Iris	4½	inches deep, 6 inches apart
Tuipils	4½	inches deep, 5 inches apart
Lilies	6	inches deep, 8 inches apart

HOW TO PLANT

In light and sandy soil bulbs should be planted a little deeper. A covering of straw will make the plants bloom earlier and the flowers larger, and a good supply of well rotted manure worked in the soil before the bulbs are planted will aid very materially in producing beautiful blooms.

FOR INDOOR CULTURE

For indoor planting bulbs should be potted as soon as possible and then left out in the open, covered with a few inches of soil until freezing weather, and then brought into the cellar or other sheltered place where the temperature is not over 50 degrees, but, of course, not freezing. Keep in the dark until the roots are well established and then they may be brought to the light and will flower from time to time till Easter.
